APPENDIX 1: APPEAL DECISION APP/G1630/W/20/3256319

1. INTRODUCTION

- 1.1. This representation has been made by Ridge and Partners LLP on behalf of Rudgeway Farms Ltd. Richard Harvey and Caroline Horne; The Spires Family Partnership; and Bloor Homes Western to answer the matters, issues and questions set out by the Inspector in relation to the Tewkesbury Borough Local Plan Examination which was submitted to the Secretary of State on 18th May 2020 under Regulation 22(3) of the Town and County Planning (Local Planning) (England) Regulations 2012.
- 1.2. Our clients continue to promote Land to the South of Wheatpieces, Tewkesbury through the emerging Local Plan, having submitted representations for its suitability and availability to deliver circa. 350 dwellings and approximately 1,800 sq. metres of B1 use (offices) during the Regulation 19 Pre-submission Consultation. It has been demonstrated its delivery will contribute to the 2,454 additional dwellings required to meet the Borough's housing need as identified through the Joint Core Strategy in 2017 and will contribute significantly to the Council's lack of five year housing supply which has fallen to 1.82 years as highlighted in recent appeal decision APP/G1630/W/20/3256319 (attached at **Appendix 1**).
- 1.3. Specifically, this representation seeks to address "Matter 2: Overall housing provision in the TBP" of the Inspector's list, answering questions 2.2, 2.6, 2.7 and 2.11. As these questions are not site specific, Land to the South of Wheatpieces is not referred to in detail, however, the answers contained within this representation support the requirement and delivery of additional sites such as Land to the South of Wheatpieces to come forward to support the housing shortfall and significant lack of five year housing land supply.

2. MATTER 2: OVERALL HOUSING PROVISION IN THE TBP

2.1 The following section relates to “Matter 2: Overall housing provision in the TBP” where the Inspector raises the issue of:

“Whether the TBP provides for the quantity and distribution of housing required by the strategic policies of the JCS.”

2.2 To help address this matter, the following will seek to answer questions 2.2, 2.6, 2.7 and 2.11. It should be noted the answers to all questions are interlinked and ultimately support the answer to question 2.2.

Questions 2.2, 2.6, 2.7 and 2.11

2.3 Question 2.2 states:

“Given the provisions of the JCS, the current JCS review, and the subsidiary role of the TBP to allocate non-strategic sites, does the TBP make the required contribution towards meeting the housing needs of Tewkesbury borough over the plan period 2011-31? Will the remaining shortfall be provided through the JCS review, or in other ways, in the necessary timescale, and if not, is this a matter for the TBP.”

2.4 The Pre-Submission Local Plan (LP) under Policy RES1 lists 21 proposed housing site allocations, equating to approximately 1,115 new dwellings to be delivered over the plan period. This figure excludes any strategic allocations at Tewkesbury Town including Northway and Ashchurch which are to be delivered through the JCS review according to the LP and Housing Background Paper (HBP) (October 2019). It is also noted within the HBP that 66 of the 1,115 new dwellings already benefit from planning permission leaving an uncommitted supply of 1,049 dwellings to be delivered over the plan period with approximately 300 dwellings to be located at Tewkesbury Town. With this figure and all sources of housing supply (including completions and commitments), as demonstrated at Table 10 of the HBP, the total supply of housing for the borough up until 2031 is 8,261 which reduces the overall housing shortfall to 1,638 homes.

2.5 It is noted that the role of the JCS review will help address the shortfall identified and that the emerging LP will identify sites to contribute toward the Borough’s housing supply. However, both these elements are reliant upon one another and therefore in addressing question 2.2 and thereafter questions 2.6, 2.7 and 2.11 consideration has to be given the status of the JCS review and the Council’s lack of five year housing land supply.

- 2.6 In dealing with the latter first, the Council's reliance on their sources of housing supply¹ cannot be fully supported given the recent appeal decision at Land off Ashmead Drive, Gotherington² where the Inspector found that the Council can only demonstrate 1.82 years of housing land supply and stated she had "very little evidence" to indicate whether any of the sites in the trajectory would come forward in the next five years. Within that appeal decision the Inspector concluded that the Council's additional supply of housing delivered over previous years could not offset the Council's inability to demonstrate a five year housing land supply and made reference to Paragraph 73 of the NPPF which requires LPA's to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies. Further, the Inspector disputed the delivery of sites within the Borough that currently have permission, namely Land at Fiddington and Land at Stoke Road. According to the Tewkesbury Borough Housing Monitoring Report 2019/20 (published December 2020) both sites have not delivered any number of dwellings since their permission, equating to a total of 1,065 homes. This number contributes significantly towards the 8,261 dwellings to be delivered within the Borough up until 2031. Whilst their delivery is possible within the plan period, its uncertainty poses the question on the Borough's ability to meet its housing supply over the plan period, particularly given the significant lack of five year housing land supply. Further, this shortfall is not reflected in the HBP and thereafter the emerging LP.
- 2.7 To that end the lack of five year housing land supply weakens the reliance upon the Borough's housing supply up until 2031 and therefore creates uncertainty as to whether the proposed site allocations within the LP would meet the housing supply for the Borough. To answer the Inspector's question at 2.11, it is considered that the Borough will not be able to demonstrate a satisfactory five year housing land supply position once the LP is adopted and it is anticipated this won't be resolved until the adoption of the JCS review, unless a number of large-scale sites come forward for development during that time. Even then those sites will need to have gone through the planning application process before development can start. Consequently, we consider it for the LPA to identify further sites through the emerging LP above those listed at Policy RES 1 to mitigate against this shortfall.
- 2.8 As above, the Council recognise that the shortfall of housing identified in 2017 by the JCS will have to be identified in the JCS review. This is echoed at paragraph 3.2.18 of the adopted JCS:
- "An **immediate review** of the JCS would allow for the remaining shortfall to be addressed by exploring additional sites both within and outside the JCS area..."* [own emphasis added].
- 2.9 As above, the requirement for an immediate review has evidently not been met. At present, it is forecasted that the JCS review at best will be adopted within the next 3/4 years, and then the delivery of allocations within that be developed 2/3 years after, demonstrating significant delays in

¹ Table 10 of the HBP.

² See **Appendix 1** for details.

the delivery of housing for the Borough and moreover the wider JCS area. Given this, little weight can only be attributed to the JCS review.

- 2.10 Consequently, the delays in the progression of its review raise concerns over the ability to address this shortfall and in turn has implications on the role of the emerging LP and whether the proposed site allocations are adequate to meet the Borough's housing supply need.
- 2.11 At this point it is worth noting at question 2.6 the Inspector asks *"JCS Table SP2a appears to require the TBP to identify further potential for 315 dwellings. Is this correct, and if so has this requirement been met?"* We consider it for the Council to answer this question, however, our position is that the 315 dwellings identified in that table excludes the 2,450 housing shortfall identified within the JCS. That said, with the significant delay in the JCS review and the considerable lack of five year housing land supply, it cannot be considered that the 315 dwellings will be met through the emerging LP given the failure to address the 2,450 housing shortfall thus far.
- 2.12 In addition, at question 2.7 the Inspector highlights the absence of a specific housing requirement for Tewkesbury Town within the JCS and that the HBP states it is not for the LP to provide an identified housing requirement either. The Inspector then asks, *"is the overall housing provision in the TBP for Tewkesbury town justified, consistent with the JCS and has the plan been positively prepared in this respect?"*
- 2.13 At paragraph 14.1 the HBP states the proposed allocations within the emerging LP would deliver approximately 300 (uncommitted) dwellings at Tewkesbury Town. However, as there is no amount of housing identified for Tewkesbury town in either the JCS nor emerging LP it is difficult to assess whether the 300 dwellings is justified and consistent with the JCS and moreover the JCS review. Therefore, we consider this element of the LP cannot be positively prepared failing to comply with part b) of Paragraph 16 of the NPPF.
- 2.14 The LP's role is to contribute toward the housing targets within the JCS and support its strategic policies. However, with the identified housing shortfall in the current JCS, the stage at which the JCS review is at and the significant lack of five year housing land supply the LP should reduce its reliance on the JCS review and focus on how it can better its position to address at the very least, the lack of housing supply in the Borough.

Meeting the requirements of Paragraph 16 of the NPPF

- 2.15 Paragraph 16 of the NPPF requires plans to, amongst others, *"be prepared with the objective of contributing to the achievement of sustainable development"* and *"be prepared positively, in a way that is aspirational but deliverable."*
- 2.16 The above has demonstrated that the proposed housing site allocations under Policy RES 1 are not considered to meet to the housing supply for the Borough up until 2031. This is due to the significant

lack in five year housing land supply and the reliance on the JCS review, which can only be attributed limited weight at this stage.

- 2.17 We consider that in order for the emerging LP to be planned positively in a way that is both aspirational and deliverable the Council need to identify further sites for development to achieve the required housing supply, particularly given the considerable delays in the JCS review. Consideration should be given to sites that are sustainably and suitability near to Tewkesbury Town, Rural Service Centres and Service Villages with minimal constraints. Consequently, the plan will be seen to contribute towards achieving sustainable development by delivering adequate housing to meet the significant shortfall in both the Borough and wider JCS area.

3. CONCLUSIONS

- 3.1 This representation has been made by Ridge and Partners LLP on behalf of Rudgeway Farms Ltd. Richard Harvey and Caroline Horne; The Spires Family Partnership; and Bloor Homes Western to address “Matter 2: Overall housing provision in the TBP” of the Inspector’s list, answering questions 2.2, 2.6, 2.7 and 2.11 in relation to the Tewkesbury Borough Local Plan Examination which was submitted to the Secretary of State on 18th May 2020 under Regulation 22(3) of the Town and County Planning (Local Planning) (England) Regulations 2012.
- 3.2 The above has demonstrated that the emerging LP fails to meet the housing supply for the Borough up until 2031 given the reliance the LP places on the JCS review to help meet the shortfall, which is at its very initial stages and is not likely to carry significant weight until 3/4 years time. This shortfall has since been exacerbated where an Inspector within appeal decision APP/G1630/W/20/3256319 found the Council can only demonstrate 1.82 years of housing supply. Given this, it is not considered the Council will be able to demonstrate a satisfactory five year housing land supply position once the LP is adopted and is unlikely to until the JCS review has been adopted.
- 3.3 Given the stage the JCS review is at and the lack of five year housing land supply it is not considered the LP can cover this shortfall within the plan period. This includes the approx. 300 dwellings that are to be delivered in Tewkesbury Town as part of the emerging LP which has been demonstrated as being difficult to assess whether this corresponds with the adopted JCS and JCS review given no identified housing requirement has been identified for this part of the Borough.
- 3.4 To that end, it is concluded that the emerging LP in its current form does not plan positively in a way that is aspirational and deliverable and consequently does not contribute to achieving sustainable development, failing to comply with Paragraph 16 of the NPPF.
- 3.5 We consider that the emerging LP should reduce its reliance on the emerging JCS and look for ways in which to increase its housing supply through identifying further sites for development. Whilst we acknowledge that is the role of the JCS to overcome this housing shortfall, the emerging LP at the very least could support this through the allocation of further sites for development to help meet its housing supply for the plan period.
- 3.6 We respectfully request the above is given due consideration during the examination of the LP.

APPENDIX 1

Appeal Decision

APP/G1630/W/20/3256319

Appeal Decision

Inquiry held on 30 November – 4 December 2020

Site visit made on 9 December 2020

by Katie McDonald MSc MRTPI

an Inspector appointed by the Secretary of State

Decision date: 12th January 2021

Appeal Ref: APP/G1630/W/20/3256319

Land off Ashmead Drive, Gotherington

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by J J Gallagher Limited and Mr Richard Cook against the decision of Tewkesbury Borough Council.
 - The application Ref 19/01071/OUT, dated 25 October 2019, was refused by notice dated 16 June 2020.
 - The development proposed is an outline planning application with means of access from Ashmead Drive (all other matters reserved for subsequent approval), for the erection of up to 50 dwellings (Class C3); earthworks; drainage works; structural landscaping; formal and informal open space; car parking; site remediation; and all other ancillary and enabling works.
-

Decision

1. The appeal is allowed and planning permission is granted for an outline planning application with means of access from Ashmead Drive (all other matters reserved for subsequent approval), for the erection of up to 50 dwellings (Class C3); earthworks; drainage works; structural landscaping; formal and informal open space; car parking; site remediation; and all other ancillary and enabling works at Land off Ashmead Drive, Gotherington in accordance with the terms of the application, Ref 19/01071/OUT, dated 25 October 2019, subject to the conditions set out in the attached Schedule.

Preliminary Matters

2. This appeal is an outline planning application for up to 50 dwellings with all matters except for access reserved. Indicative plans have been provided detailing the layout and landscaping. I have had regard to these so far as relevant to the appeal.
3. The Tewkesbury Borough Local Plan 2011-2031 - Pre-Submission version 2019 (eLP) is due to be examined in early 2021. However, the Hearing dates have not yet been confirmed and no examination has taken place. There are also unresolved objections. Therefore, I attach little weight to the emerging policies.
4. The joint authorities in the area are in the early stages of preparing a Joint Core Strategy Review. Given its stage in the examination process, I give it very little weight.
5. The Cotswolds Conservation Board received Rule 6 Party status and presented evidence on the second main issue at the Inquiry.

6. Several planning obligations were submitted in draft form, discussed at the Inquiry and subsequently finalised. I have taken them all into account.
7. Reasons for refusal 4 and 5 were not pursued at the Inquiry owing to the drafting of the planning obligations. I have proceeded to determine the appeal accordingly.

Main Issues

8. The main issues are:
 - (a) Whether the proposal would accord with the Council's plan led strategy for housing and growth;
 - (b) The effect of the proposal on the landscape character and appearance of the area; including the setting of, and the effect in, the Cotswolds Area of Outstanding Natural Beauty; and,
 - (c) The effect of the proposal on the social well-being and vitality of Gotherington.

Reasons

9. Located to the south of Gotherington's settlement boundary, the site is an open and relatively flat field. Existing residential development influences the northern and eastern boundaries of the site. To the western boundary, houses on Shutter Lane are evident to the north western part, but to the south of the public right of way (PRoW) that transects the site, the park home caravan site is not overly prominent from the site itself. Agricultural fields extend to the south, separating Gotherington from Bishops Cleeve, a larger village over 500m away.
10. To the north and east of Gotherington is the Cotswolds Area of Outstanding Natural Beauty (the AONB) and the site falls within a locally designated Special Landscape Area (SLA). Policy justification sets out that the SLAs play a role in providing the foreground setting for the adjacent AONB.
11. The proposal is for outline planning permission, developing the site for up to 50 dwellings. Based on the land use plan, these dwellings would be located to the south side of the site with large areas of formal and informal open space proposed on the northern and western parts of the site.

Strategy for housing and growth

12. Gotherington is identified as a Service Village in the Gloucester, Cheltenham and Tewkesbury Joint Core Strategy 2011-2031 (December 2017) (JCS). Policy SP2 of the JCS details that Service Villages will accommodate in the order of 880 dwellings, yet this number is not a maximum.
13. Policies SP2 and SD10 of the JCS broadly encourage residential development to be located in Gloucester, Cheltenham and Tewkesbury, along with rural service centres and service villages. The site is not allocated for development in the JCS and does not meet any of the exception criteria in Policy SD10, sitting outside the settlement boundary of Gotherington.
14. Policy GNDP02 of the Gotherington Neighbourhood Development Plan 2011-2031 (September 2017) (NDP) identifies 3 sites for residential development. The site is not identified. The latter part of the policy refers to the future

development plan identifying the possibility of additional strategic housing need in Gotherington, with criteria if this occurs.

15. Similarly, policies GNDP03 and GNDP11 of the NDP set out criteria for development outside of the defined settlement boundary and not on allocated sites. One of the criteria in both policies is where evidenced need for additional housing in Gotherington has been established through the development plan and cannot be met within the defined settlement boundary.
16. The NDP identifies that Gotherington should provide around 86 homes between 2011-2031. This is based upon evidence in the Council's "Approach to Rural Sites" (February 2015) document, which has also formed the evidence base for the eLP. The allocated sites proposed a minimum of 66 new dwellings, with the 3 ensuing planning permissions granting 69 dwellings. Paragraph 5.11 of the NDP sets out that with the 3 allocated sites, and including 26 dwellings completed prior to the NDP being made, there would be a minimum of 92 dwellings delivered.
17. The appellant argued that the 3 allocated sites would not deliver the 92 dwellings and there was a shortfall of 23 units. I disagree. When 5.11 is read as a whole, 26 units were delivered after 2011 while the NDP was being prepared/examined. These form part of the housing supply in the plan period. Therefore, based upon the NDP, there is no identified shortfall of housing in Gotherington itself. That said, the Council acknowledge there is a shortage of housing in the Borough, with there being less than a 5 year housing land supply. I shall return to this matter later.
18. To conclude on this main issue, the location of development would not accord with the Council's plan-led strategy for housing and growth. This would be contrary to policies SP2 and SD10 of the JCS and policies GNDP02, GNDP03 and GNDP11 of the NDP. There would be conflict with Policy RES3 of the eLP, as the location of development would also not meet the strategy for the distribution of new development in the area, given the settlement boundary of Gotherington is not proposed to change in the eLP.

Landscape character and appearance

19. There are several topic areas in relation to this main issue referred to in the reason for refusal and the evidence before me. Therefore, I have split this section into subheadings dealing with each issue before concluding overall.
20. Although the site is within the SLA, its contribution to the setting of the AONB is limited. It has few special qualities aside from being a pleasant undeveloped field and given its proximity to the village and sense of enclosure on most sides, even its landscape and visual quality is low.
21. The importance of the AONB is enshrined by statute, and paragraph 172 of the National Planning Policy Framework (the Framework) gives great weight to conserving and enhancing landscape and scenic beauty in AONBs. Additionally, Policy SD7 of the JCS requires proposals within the setting of the Cotswolds AONB to conserve and, where appropriate, enhance its landscape, scenic beauty, wildlife, cultural heritage and other special qualities. Proposals will be required to be consistent with the policies set out in the Cotswolds AONB Management Plan 2018-2023 (MP). Various policies in the NDP also seek to

protect the AONB and views into and out of it, particularly those from Nottingham Hill and Cleeve Hill.

22. Policy CE1 of the MP sets out that proposals that are likely to impact on, or create change in, the landscape of the Cotswolds AONB, should have regard to the scenic quality of the location and its setting and ensure that views – including those into and out of the AONB – and visual amenity are conserved and enhanced.

Views towards the AONB

23. From the PRow that runs east west and the PRow that runs south to Bishops Cleeve, views of the AONB can be appreciated, especially towards Nottingham Hill and Cleeve Hill.
24. The proposal would introduce built development onto the southern parcel of the site. By its very existence, views from the PRowS towards the AONB, in particular Nottingham Hill, would be changed by the introduction of housing. Whilst these views are of a high quality, given they take place from the PRowS, the views are transient, appreciated by people travelling along the routes for a relatively short amount of time.
25. A large area of open space on the northern part of the site, along with footpath linkages is proposed. Unlike the existing transient views, the open space would provide people with the opportunity to spend time viewing the AONB, which would still be visible above or between the new houses depending upon where one was situated on the open space. Furthermore, the appellant has submitted a unilateral undertaking (UU) that makes provision for a multi-purpose community area (MPCA). The purposes of this space would be for meeting, play or holding events and the UU describes its form would be either a seating area (such as a mini amphitheatre) or covered space (such as a band stand).
26. Providing the MPCA is sensitively sited, the space, particularly that of a mini amphitheatre, would provide a formal area in which the public could view the AONB, including Nottingham Hill for as long as they desired. Owing to the formal and informal space becoming publicly available space, existing views from this currently private part of the site towards the escarpment and AONB would become publicly available. Whilst these views would include the new housing development in the foreground, I do not consider that this would significantly reduce the quality of the view. This is because existing housing development is visible from the existing PRowS and the 'new' views could be appreciated for a longer and more leisurely period. Additionally, views from the PRowS would also remain above or between the dwellings, such that at different points along the PRowS, some views could still be gained.

Views from the AONB

27. The effect of the proposal on views from Nottingham Hill and Cleeve Hill was the subject of much discussion during the Inquiry, and I viewed the site from both viewpoints on my visit.
28. Evidence at the Inquiry focussed on whether paragraph 172 of the Framework was relevant to this appeal. Having regard to case law¹ presented, along with the Planning Practice Guidance, in my view, although the proposal is outside

¹ Stroud District Council v SSCLG v Gladman Developments Limited [2015] EWHC 488 (Admin)

the AONB, the effect on views out of the AONB, gained from within the AONB would result in paragraph 172 being relevant.

29. *Nottingham Hill* – the appellants conclude the effect from this viewpoint would be moderate adverse. The Council state major/moderate adverse. The Rule 6 Party state significant adverse.
30. The viewpoint takes in a panoramic view from the Cotswold escarpment towards the Vale of Gloucester/Severn Vale with the Malvern Hills beyond. Gotherington is prominent in the foreground and the proposal would be visible. That said, the view is extensive and long ranging, and the development would be located between 2 ‘fingers’ of development that run along Cleeve Road and the park home caravan site. Whilst it would introduce permanent built development onto an undeveloped site, it would be an edge of settlement site, enclosed from this view point on 3 sides by other built development, such that in the context of the wide ranging view, the proposal would not lead to a major or significant adverse effect. Indeed, I agree with the previous Inspector, who assessed a similar appeal² at this site, that it would recede into the existing settlement pattern.
31. However, I acknowledge that views from the escarpment are one of the special qualities of the AONB, and the effect would be moderately adverse owing purely to the introduction of built development and the change to the view. This would lead to a moderate harm to the AONB from this viewpoint.
32. *Cleeve Hill* – the view from Cleeve Hill is more extensive than that from Nottingham Hill and takes in Cheltenham, Bishops Cleeve, Gotherington, other villages and open countryside. Views of the site are available and it is seen as part of the gap between Gotherington and Bishops Cleeve, yet, the site is clearly enclosed on 3 sides by development from this viewpoint. Additionally, in the context of the wide panoramic views taken from this point, the development of the site would have a neutral effect.

Coalescence of Gotherington and Bishops Cleeve

33. Spatially, the gap between Gotherington and Bishops Cleeve would not be reduced by the proposal given the existing development to 3 sides of the site. Indeed, the narrower gap that exists between dwellings on Cleeve Road and the Homelands site would remain the same, and there would be a substantial gap of over 500m remaining between the site and Bishops Cleeve.
34. When viewed from Nottingham Hill, even with the new residential development that has taken place in Bishops Cleeve, because much of Bishops Cleeve is not readily visible, and the site is enclosed on 3 sides, it would also not result in encroachment or perceived coalescence of the villages.
35. From Cleeve Hill, similarly, the site is visibly enclosed by existing development and the proposal would not contribute towards further coalescence of Gotherington and Bishops Cleeve. From other viewpoints around the site, there would not be a noticeable reduction in the gap.
36. Nonetheless, perceptually, residents and the Council take the PRoW running east west across the site to be the natural line of where development stops in the village. Development to the south of this, where the housing is proposed,

² APP/G1630/W/17/3175559

would, in their view, perceptually bring Gotherington closer to Bishops Cleeve. When travelling on the PRoW than runs north south between the villages, I agree there would be a sense of development advancing towards Bishops Cleeve.

37. However, the indicative plans show a landscaping buffer to the southern edge of the site. This would continue the existing well-established landscaping strip to the south east corner of the site along the southern boundary, to the extent that any perceptual effect of encroachment from this PRoW would be satisfactorily ameliorated over time. Therefore, a strong sense of separation would be maintained.
38. The site's allocation in the eLP strategic gap policy was also the subject of much discussion. However, this is a matter for the Local Plan Inspector in examining the eLP.
39. Nevertheless, it is my view that the site does not function as an essential part of the gap between villages and development of the site would appear as an infill. Additionally, a clear gap would remain which is likely to be subject to protection in the eLP, and development of the site would not result in coalescence of Gotherington and Bishops Cleeve.

Linear form of Gotherington

40. The proposal would not project into the open countryside beyond existing development southwards. When viewed from Nottingham Hill, although the depth of Gotherington would become greater and the proposal would not follow the linear shape of the settlement; to my mind, it would be read as infill development. Even so, Malleson Road and Gretton Road would remain as the most prominently developed roads in the village, and the linear form would not be adversely affected.

Conclusion on landscape character and appearance

41. Given its location adjacent to the settlement boundary, the relatively enclosed nature of the site and its limited contribution to the SLA; development of the site would not appear as a significant encroachment into the surrounding rural landscape that could be considered as harmful or disproportionate. The gap between villages would be maintained and the linear nature of Gotherington would not be adversely affected. Views towards the AONB from the site would change, but with the views that would become available from the open space, the effect would be acceptable.
42. It is, however, inevitable that there would be a permanent change to the landscape character of the area by the development of a greenfield site with housing. Whilst the site is not a valued landscape for the purposes of paragraph 170 (a) of the Framework, the site is locally valued, and the proposal would not enhance the landscape character of the area. For this reason, there would be some limited harm. There would also be a moderately adverse effect from the viewpoint at Nottingham Hill. Furthermore, whilst the effect on the view from Cleeve Hill would be neutral, it would not enhance landscape and scenic beauty.
43. Therefore, when looking at the overall effect and drawing this together, it is my view that the proposal would lead to some limited harm to landscape character and appearance of the area and the setting of the AONB. There would be

overall moderate harm to views from the AONB. Thus, the proposal would conflict with Policy LND2 of the LP, Policies SD6 and SD7 of the JCS, Policies GNDP02 and GNDP09 of the NDP, and Framework paragraphs 170 and 172. However, given my finding on the views towards the AONB, there would be no conflict with GNDP10 of the NDP, which seeks to give special attention to locally significant views.

44. Like the previous Inspector, I agree that LND2 of the LP is not entirely consistent with the Framework, and this reduces the weight which I afford it.
45. Whilst I do not find the site to be of high quality in landscape terms, based on the current eLP, there would be conflict with Policy LAN1, which seeks to maintain the quality of the natural environment and its visual attractiveness. However, given my findings on the gap, there would be no conflict with Policy LAN3 of the eLP, which seeks to protect the strategic gaps.
46. My conclusion on this main issue is different to that of the previous Appeal Decision on this site. However, I do not know what evidence was presented to this Inspector; and the evidence presented to me, particularly the effects from the AONB, have led me to a different opinion.

Social well-being of Gotherington

47. Gotherington village is identified as a Service Village in the JCS and would be expected to take a reasonable amount of new housing development. That said, the village has seen housing developments built out over the last few years on sites at Malleson Road and Shutter Lane.
48. The previous Appeal Decision at the site, for a very similar development, found there would be harm to the social well-being of the village at the time of the decision. This was owing to the scale and extent of development that had taken place in the village at the time, and the Inspector was not provided with persuasive evidence that the facilities were capable of expansion.
49. However, since this decision was made in April 2018, these housing developments have been substantially completed such that it would be reasonable to conclude that their effect upon the village has been largely absorbed or would be by the end of this year. Indeed, the appellant's evidence indicates that the last property within the Shutter Lane development was purchased in September 2017, and development of Malleson Road is projected to be completed by the end of March 2021. Development of this site would not commence until around 2023/24, and at that point, would result in around a 9% increase in the village, which is not exceptionally large, nor disproportionate to the size of the village at that time. I also note there is no anticipated delivery of homes in Gotherington between 2021/22 to 2022/23, nor anytime beyond this except for this site. Thus, when dwellings would start to be delivered, no new homes would have been delivered in the village for 2 years, so any new development could be assimilated differently to when the previous Inspector was considering the proposal.
50. Moreover, as part of the proposal, a Multi-Use Games Area (MUGA), Locally Equipped Area of Play (LEAP) and MPCA would be provided on-site within the area of Public Open Space. This MUGA and MPCA are new to the proposal before me. Together with the LEAP, these facilities are likely to act as a focal point for the development which would benefit both new residents and the

existing community. The public open space and MUGA would also accord with aspirations from the NDP by providing more activities for young people. The MUGA could be used for football of which residents assert a shortage, and any potential noise issues would be addressed at a later stage. The MPCA would deliver a social benefit for people of all ages being able to meet in a formalised area, and the LEAP would provide an area of play for children and parents or carers to meet. These on site facilities would be of a social benefit and contribute towards supporting strong, vibrant and healthy communities. The current space is valued by the community and formalised use of it would be of benefit to the existing residents.

51. Furthermore, the monetary contributions towards the provision of school places, which is agreed by the County Council, indicates that the increase in demand can be accommodated, even if this is in Bishops Cleeve. However, as the catchment area for the primary school includes this site, I see no reason why occupiers of the new dwellings would not be able to access school places over time. Other planning obligations will provide monies toward libraries to ensure any effect upon their capacity is suitably mitigated. The Community Infrastructure Levy (CIL) would also provide monies in the village.
52. The range of services in the village is satisfactory and although the Council considered them to be generally low quality, I disagree. The evidence I have been presented with demonstrates that the facilities are well used, and new residents could access them if they wished to do so. This would have a positive effect upon local services and facilities. Furthermore, whilst there may be waiting lists for some groups, this is not uncommon for popular children's activities. The residents assert that the village hall has a restricted layout and size. Whilst this may be the case, there are other facilities in the village, such as the Old Chapel, and it is also not uncommon for older community buildings to have some form of size restriction.
53. Whilst the proposal is not anticipated by the NDP, the cumulative development of the village would not be overly disproportionate, and there is no tangible evidence before me that the village has reached capacity. Furthermore, I gauged a strong sense of community from the interested parties such that I see no reason why new residents would find it difficult to assimilate into the village.
54. Therefore, the proposal would not be harmful to the social well-being and vitality of the village. Moreover, given the onsite facilities and the many benefits new housing can bring by enabling local people to stay local, providing family homes and contributing to the local economy, it could lead to an enhancement of the vitality and well-being in the village.
55. This would be compliant with Policy SP2 of the JCS, which seeks to accommodate lower levels of development proportional to their size and function. There would also be compliance with the Framework, which seeks to support strong, vibrant and healthy communities.

Other Matters

Housing Land Supply

56. The Council cannot demonstrate a 5 year housing land supply. At this appeal, the Council claim that it has 4.37 years supply, based on the October 2020 Five

Year Housing Land Supply Statement (HLSS). The appellants assert 1.82 years. The significant difference in numbers is largely attributed to the Council's reduction in its 5 year annual requirement owing to a significant oversupply in previous years.

57. On the first day of the Inquiry, the appellants brought to my attention the Council's response to the eLP Examining Inspector's preliminary questions. Within this document, the JCS Monitoring Report (Autumn 2020) is appended and sets out that Tewkesbury Borough has 2.9 years of housing supply. To explain this clear anomaly in evidence, the Council referred me to paragraph 3.2 of the response, which sets out that "*the Council's Housing Monitoring Report 2019/20 and Five Year Supply Position Statement will provide the most up to date information specific to Tewkesbury Borough*". However, whilst this may be the Council's position, the JCS Monitoring Report is dated a few months prior to the publication of the HLSS and the very different figures in each document weakens the Council's position on this matter.

Additional supply

58. The Council indicate that their approach to incorporating additional supply is consistent with Planning Practice Guidance (PPG) paragraph 32³. This states that "*where areas deliver more completions than required, the additional supply can be used to offset any shortfalls against requirements from previous years*". However, paragraph 73 of the Framework states "*LPAs should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies*".
59. The policy in the Framework makes no allowance for subtracting additional supply from the annual requirement. Moreover, whilst the guidance in the PPG enables LPAs to take additional supply into account, there is no requirement to do so. It is not a symmetrical approach to dealing with undersupply as advocated by the Council.
60. PPG paragraph 32 details that the additional supply can be used to offset shortfalls against requirements from previous years. Therefore, shortfalls against requirements from previous years would be necessary, in order to take account of any additional supply. The requirement from previous years, being those since the development plan was adopted, is 495 dwellings per annum (dpa). In the 3 years since adoption, there has been an overall surplus of 797 dwellings, and since the base date there has been an overall surplus of 1,115 dwellings. Therefore, there is no shortfall against requirements from previous years which could conceivably be offset.
61. Furthermore, for a site to be considered deliverable, it should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Housing already delivered cannot possibly meet this definition.
62. The Council's argument that the loss of additional housing delivery would have significant implications for plan making, potentially resulting in Council's holding back sites and restricting sites, is unfounded. This is because it would be unreasonable to refuse planning permission for housing if there had been

³ Reference ID: 68-032-20190722

additional supply, bearing in mind the Government's objective of significantly boosting the supply of homes. Additionally, Policy SP1 of the JCS requires at least 9,899 new homes. There is no maximum number.

63. Whilst it is clear that housing above the annual requirements has been delivered in the area and housing supply has been boosted in line with the Framework; it is my view that additional supply is not a tool that can be used to discount the Council's housing requirement set out in its adopted strategic policies. Consequently, the annual requirement should be 495 dpa as set out in the adopted strategic policies, and the future supply should reflect this. Therefore, the past additional supply should be removed from the 5 year housing requirement. As detailed by the appellant, this would reduce the housing land supply to 2.4 years.

Disputed sites

64. *Land at Fiddington, Ashchurch* – the site has outline planning permission and is subject to several planning conditions. One of these is the submission of a site wide master plan prior to reserved matters, which is currently being considered by the Council. As it stands, there are outstanding concerns from Sport England and a re-consultation was taking place.
65. There have been no pre-application discussions or the submission of reserved matters application, nor does it appear any site assessment work has taken place. There is also no known developer. Notably however, the email I have from the site promoter, which agrees with the Council's trajectory in the HLSS, postdates the publication of the HLSS. This raises significant concerns over the validity of the trajectory used. I appreciate the site promoter may have a good track record for delivering sites and the Council believe there is no reason to prevent development within a 5 year period, yet, the site promoter is not the developer. The test in the Framework is that there should be clear evidence that housing completions will begin on site within five years. In this case, I do not believe I have clear evidence.
66. *Land at Stoke Road, Bishop's Cleeve* – similar to the above site, the site has outline planning permission. The Council is in pre-application discussions with a major housebuilder, but these details are confidential. However, no reserved matters, site assessment work or conditions have been submitted for discharge. The site remains in the ownership of the promoter, and again, the email from the site promoter, which considers the Council's trajectory to "*remain broadly accurate*" also postdates the publication of the HLSS.
67. Therefore, it would be unrealistic to expect housing to be delivered on site in 2022/23, and I have no clear evidence to suggest this. Yet, the pre-application discussions indicate that there is developer interest and it would be reasonable to assume some delivery in 2023 and beyond.

Future supply

68. Aside from the 2 disputed sites and windfall developments, there is only one other site beyond years 1 and 2 in the trajectory which is predicted to deliver 5 dwellings. Notwithstanding my findings on the above sites, this is a grave situation.
69. The Council asserts that the eLP contains numerous housing allocations, which will feed into the supply following adoption. However, at the current time, the

plan is of limited weight and these allocations should not be included in the trajectory. Furthermore, the eLP details that it is not the role of the Plan to meet the shortfall identified by the JCS, but it could contribute towards meeting some of this housing need.

70. The JCS was adopted with a shortfall, which was to be remedied by an immediate review on the plan. It is now 3 years later and there is little progress towards this.
71. The trajectory does not include sites which have a resolution to permit awaiting planning obligations. I also have very little evidence to indicate if any of these would come forward in the next 5 years. There are also, it is asserted, numerous major applications for housing being considered. Nonetheless, as these sites are not been included in the trajectory, I have little evidence whether these would be deliverable.
72. Therefore, despite the Council's arguments, the future supply in the borough, at the current time is deeply concerning.

Conclusion on housing land supply

73. Considering my conclusions on the additional supply and the disputed sites, the housing land supply would reduce to 1.82 years. This reflects the appellant's conclusions. Additionally, the lack of supply beyond year 3 is deeply concerning; and, even if I had taken account of the additional supply, the Council would still not have a 5 year housing land supply and the past trend of additional supply is not projected to continue.

Provision of market and affordable housing

74. The state of housing land supply is such that very significant weight should be given to the delivery of housing generally. Additionally, the Council could provide me with no 'better' sites for development. The site has good accessibility to facilities and services using a genuine choice of transport modes.
75. Furthermore, the proposal would deliver 40% affordable housing. This would be policy compliant (with JCS SD12) and there is an accepted need for 126 affordable houses per annum in Tewkesbury. The appellant asserts there will be a shortfall of 333 affordable dwellings in the next 5 years. The Council does not dispute this, and the delivery of this site would double the affordable housing stock in the village.
76. Although I heard comments from interested parties that there is little need for affordable housing in the village itself, on the substantive evidence before me, there is little affordable housing stock in the village and there is a clear need in the Borough. This proposal would deliver a considerable amount of affordable housing, which is a benefit of significant weight.

Ecology and biodiversity

77. The proposal would produce net gains in biodiversity from the creation of attenuation features, with permanent water elements, tree planting and wildflower grassland within areas of open space. It would create around 17% net gain for habitat areas and about 83% net gain for linear features. This is a significant benefit in favour, providing more net gains than would be necessary.

Habitats Regulations Assessment

78. The proposal is near to Cleeve Common Site of Special Scientific Interest (SSSI), Dixton Wood Special Area of Conservation (SAC) and Bredon Hill SAC, such that development of the site could have a significant effect upon the important interest features of the sites. These effects would be the increase in people who may visit the SSSI and SACs for recreational purposes, and this could adversely affect the integrity of the sites.
79. The Shadow Habitats Regulation Assessment (SHRA) carried out by the appellant details that fewer than 1 additional visitor (0.79) would be likely to visit either the Dixton Wood SAC or Bredon Hill SAC annually. Therefore, recreational pressure would not be likely and there would be no adverse effects either alone or in-combination on the integrity of the SACs.
80. However, future residents may use Cleeve Common more frequently and the SHRA advises that new homeowners should be made aware that, in order to maintain the conservation value of the SSSI, livestock may be grazing on the common. As such, dogs should be kept under control and walkers should be vigilant. Homeowner information packs (HIPs) should be provided to all new residents, outlining informal recreational assets in the area and key 'Countryside Code' messages.
81. With the HIPs, the potential adverse effect would be avoided, and the integrity of the site would not be adversely affected. The aim of this would be to direct new residents to other sites, avoiding the SSSI. Natural England have no objections to the proposal on this basis.
82. I am satisfied that the HIP could be effectively secured by condition, and having undertaken the appropriate assessment, I am satisfied that the scheme would not adversely affect the integrity of the nearby habitats sites.

Public Open Space

83. The amount of public open space on site would exceed the standards set out in Policy RCN1 of the LP, and this would be of a moderate benefit to the scheme.

Economy

84. The development would have an economic benefit through the provision of jobs over the construction period as well as the contribution the local economy throughout the lifetime of the development. The appellant purports £3.4M gross value added per annum and £1.1M per annum on retail expenditure. However, all residential development of this scale is likely to deliver similar benefits, and this weighs moderately in favour.

Highways

85. Despite assertions from local residents, the substantive evidence presented on highway matters indicates that the surrounding highway network has sufficient capacity to accommodate the additional traffic resulting from the proposed development. Therefore, there would be no harm caused to the safety of users of the highway, nor any adverse effect upon capacity.

Planning obligations

86. There are several planning obligations. An agreement with Gloucester County Council obliges the payment of education contributions, a libraries contribution and a travel plan monitoring fee. It also obliges the developer to provide for bus stop upgrade works. The CIL Compliance Statement adequately sets out sufficient justification for the education and libraries contribution and monitoring fees, along with the requirement for bus stop upgrades. All these obligations would be necessary to make the development acceptable, directly related and fairly and reasonably related in scale and kind.
87. The travel plan monitoring fee would pay for monitoring associated with the submitted Travel Plan. During the Inquiry, I raised questions over whether the Travel Plan was necessary, given the consultation response from the Council's Highways team. Based on the evidence I heard, the Travel Plan would encourage a modal shift towards sustainable travel, which would be in accordance with the Framework, and thus the obligation would be necessary. Furthermore, access to Bishops Cleeve on the PRoW would be difficult in inclement weather and the Travel Plan could encourage means of transportation other than a private car. Therefore, the monitoring fee would be necessary to make the development acceptable, directly related and fairly and reasonably related in scale and kind.
88. A second obligation is with the Council. This would deliver at least 40% affordable housing, the onsite MUGA and LEAP (and their transfer to a management company), along with a refuse and recycling contribution and a monitoring fee. The CIL Compliance Statement submitted with the appeal sets out how each obligation would meet the tests in the CIL Regulations and the Framework. Based on this evidence, I am satisfied that each obligation contained in the second agreement would meet the tests, in that they are all necessary to make the development acceptable, directly related and fairly and reasonably related in scale and kind.
89. The last obligation is in a unilateral undertaking, which provides for the MPCA. The Council contests that this would not be compliant with the tests in the Framework. I disagree. Following on from my conclusions on the main issues, the MPCA would deliver a social benefit for the community, providing a meeting place and social focal point for residents of all ages. It would also enable an area where views of the AONB could be appreciated over a longer period than on the existing PRoWs. I consider it would be necessary to make the development acceptable. It is directly related to the development and fairly and reasonably related in scale and kind to the development.

Planning Balance

90. The proposal would conflict with the spatial strategy of the area and the NDP. It is clearly not plan-led development. However, given my conclusions on the housing land supply, the policies which govern the spatial strategy and housing development in the area are deemed out of date by Framework paragraph 11 d). Because of the very poor housing land supply position, this indicates that the spatial strategy is not effective and therefore these policies are of limited weight.
91. There would be limited harm to landscape character and appearance of the area and the setting of the AONB, and moderate harm to views from the AONB.

This would conflict with the JCS, NDP, LP, Framework 172 and the MP in this regard. However, the harm is limited for the purposes of the character and appearance of the area and this attracts limited weight against the proposal. Nevertheless, I give great weight to the moderate harm to the AONB as required by the Framework.

92. In favour of the development is the provision of housing in general, affordable housing, net gains in biodiversity and the delivery of on site facilities that would contribute towards the village's social wellbeing. The delivery of affordable and market housing would be a very significant benefit, of overriding importance when considering the chronic housing land supply position. The net gains in biodiversity are of considerable weight and the on site public open space would be of moderate weight. Additionally, there would be economic benefits during construction and from the additional residents that would contribute towards spending in the area. This is of moderate weight.
93. Framework paragraph 11 d) requires permission to be granted unless [i.] the application of policies in the Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed. Even giving great weight to the moderate harm to the AONB, it is my view that this does not provide a clear reason for refusing the development.
94. Taking account of all the above, the adverse impacts of granting planning permission would not significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole. As such, the material considerations indicate a decision other than in accordance with the development plan.

Conditions

95. In addition to the conditions I have already detailed above, the plans are listed for certainty. Furthermore, a condition requiring general compliance with the illustrative details ensures the reserved matters presented are those envisaged by the Council. Despite the Council's suggestion, reserved matters would include layout, and this would comprise internal access roads such that a separate reserved matter for access would be unnecessary.
96. A Construction Ecological Management Plan and a Landscape and Ecological Management Plan are necessary to ensure proper provision is made to safeguard protected species and their habitats. A Construction Method Statement is necessary to reduce the potential impact on the public highway, accommodate the efficient delivery of goods and supplies and ensure the effect upon residential living conditions during construction is not adverse. Archaeological investigations are necessary to ensure any archaeological remains are recorded and investigated.
97. To ensure safe access to the site for construction works, a condition requiring the access to be provided is necessary. Foul and surface water details are required to ensure the development is provided with a satisfactory means of drainage. A footpath from the site to nearby roads would need to be installed prior to occupation to ensure safe and suitable access on foot. A lighting scheme is required to safeguard protected species and their habitats, along with ensuring the village remains a low light pollution area.

98. To ensure that an appropriate housing mix is delivered to contribute to the creation of mixed and balanced communities compliant with the NDP, a housing mix statement would be necessary. A Tree Protection Plan and Arboricultural Method Statement to ensures protection of trees. A condition restricting the reserved matters to 50 dwellings is necessary for certainty.
99. I have not included conditions relating to proposed ground levels, landscaping and electric vehicle charging, as these details would be proposed at reserved matters, thus they are not necessary. The condition for site waste management has been included in the Construction Method Statement.

Conclusion

100. For the reasons set out above, I conclude that the appeal should be allowed.

Katie McDonald

INSPECTOR

APPEARANCES

For the Local Planning Authority:	
Jeremy Patterson	Solicitor and Principal Planning Lawyer, Tewkesbury Borough Council
He called	
Phil Williams BA Hons MSC MBA MRTPI	Council's planning witness

SCHEDULE OF CONDITIONS

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
- 2) Application for the approval of the reserved matters shall be made to the local planning authority before the expiration of three years from the date of this permission.
- 3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.
- 4) The development hereby permitted shall be carried out in accordance with the following approved plans: Site Location Plan (Drawing No. BM-M-04 Revision B), Land Use Plan (Drawing No. BM-M-02) and Site Access (Drawing No. SK_002 Revision P1) September 2019.
- 5) No development shall take place until a Construction Ecological Management Plan (CEMP) has been submitted to and approved in writing by the Local Planning Authority. The CEMP shall include, but not limited to the following:
 - i) Risk assessment of potentially damaging construction activities including provisions for protected species,
 - ii) Identification of 'biodiversity protection zones' including (but not exclusively) hedgerows and mature trees,
 - iii) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (may be provided as a set of method statements),
 - iv) The locations and timing of sensitive works to avoid harm to biodiversity features (e.g. daylight working hours only starting one hour after sunrise and ceasing one hour after sunset),
 - v) The times during construction when ecological or environmental specialists need to be present on site to oversee works,
 - vi) Responsible persons and lines of communication,
 - vii) The role and responsibilities on site of an ecological clerk of works (ECoW) or similar person,
 - viii) Use of protective fences, exclusion barriers and warning signs; and
 - ix) Ongoing monitoring, including compliance checks by a competent person(s) during construction and immediately post-completion of construction works.

The approved CEMP shall be adhered to and implemented throughout the construction period in accordance with the approved details.

- 6) No development shall take place until a Landscape and Ecological Management Plan (LEMP) has been submitted to and approved in writing by the local planning authority. The LEMP shall cover the first ten years of management following the commencement of construction and enabling works. Enhancement measures should be included for existing natural habitats and created habitats, as well as those for protected species. All Ecological enhancements outlined in the LEMP will be implemented as

recommended in the LEMP and the number and location of ecological features to be installed should be specified.

- 7) No development shall take place until the applicant, or their agents or successors in title, has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted to and approved in writing by the local planning authority.
- 8) No development shall take place until a Construction Method Statement (CMS) has been submitted to and approved in writing by the local planning authority. The CMS shall:
 - i) provide for the parking of vehicles of site operatives and visitors
 - ii) provide for the loading and unloading of plant and materials
 - iii) provide for the storage of plant and materials used in constructing the development
 - iv) provide for wheel washing facilities
 - v) specify the intended hours of delivery and construction operations
 - vi) include measures to control the emission of dust and dirt during construction
 - vii) a scheme for recycling/disposing of waste resulting from construction works; setting out measures for dealing with such materials to minimise overall waste and to maximise re-use, recycling and recovery in line with the waste hierarchy
 - viii) construction lighting scheme

The approved CMS shall be adhered to throughout the construction period.

- 9) No development above ground level shall commence until the site access has been provided in accordance with the submitted plan SK_0002 Revision P1. The first 20m of the access road from Ashmead Drive shall be surfaced in a bound material and the access shall be retained and maintained in that form until and unless adopted as highway maintainable at public expense.
- 10) No dwelling hereby permitted shall be occupied until surface water and foul water drainage works shall have been implemented in accordance with details that shall first have been submitted to and approved in writing by the local planning authority. The information submitted shall be in accordance with the principles set out in the approved drainage strategy. The submitted details shall:
 - i) provide information about the design storm period and intensity, the method employed to delay and control the surface water discharged from the site and the measures taken to prevent pollution of the receiving groundwater and/or surface waters
 - ii) include a timetable for its implementation; and,
 - iii) provide, a management and maintenance plan for the lifetime of the development which shall include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime.

- 11) Prior to first occupation of any individual dwelling, a footpath to that dwelling including connections to Aggs Close and Ashmead Drive, shall be completed to a minimum of 2m wide with bound surfacing.
- 12) Prior to first occupation, details of external lighting shall be submitted to and approved in writing by the Local Planning Authority. The details shall clearly demonstrate that lighting will not cause excessive light pollution or disturb or prevent bat species using key corridors, forage habitat features or accessing roost sites. The details shall include, but not be limited to, the following:
 - i) A drawing showing sensitive areas and/or dark corridor safeguarding areas.
 - ii) Description, design or specification of external lighting to be installed including shields, cowls or blinds where appropriate,
 - iii) A description of the luminosity of lights and their light colour including a lux contour map.
 - iv) A drawing(s) showing the location and where appropriate the elevation of the light fixings.
 - v) Methods to control lighting control (e.g. timer operation, passive infrared sensor (PIR)).

All external lighting shall be installed in accordance with the specifications and locations set out in the approved details. These shall be maintained thereafter in accordance with these details.

- 13) Prior to first occupation, a Homeowner Information Pack (HIP) setting out the location and sensitivities of the Cleeve Common Site of Special Scientific Interest shall be submitted to and approved in writing by the local planning authority. The HIP shall include reference to the sensitivities of the sites, messages to help the new occupiers and their families enjoy informal recreation at the site and how to avoid negatively affecting it, alternative locations for recreational activities and off road cycling and recommendations to dog owners for times of year dogs should be kept on lead when using the site (i.e. to avoid disturbance to livestock). Two copies of the HIP shall be provided to all future residents prior to occupation of each dwelling.
- 14) The approved Travel Plan (Reference: 15163-TA-V2) shall be implemented in accordance with the details and timetable therein, and shall be continued thereafter with the exception that the Travel Plan monitoring period shall be a minimum of 5 years.
- 15) Applications for the approval of the reserved matters shall be generally in accordance with the principles and parameters described in the Design and Access Statement (October 2019) and the Illustrative Site Layout BM-M-01 Revision A.
- 16) The reserved matters shall include a Housing Mix Statement to setting out an appropriate mix of dwelling sizes, types and tenures to be provided on site that will contribute to a mixed and balanced housing market. It will address the needs of the local area and of older people, as set out in the local housing evidence base, including the most up-to-date Strategic Housing Market Assessment for the area at the time of the submission of the relevant reserved matters. The development shall be implemented in accordance with the approved Housing Mix Statement.

- 17) The reserved matters shall include a scheme for the protection of retained trees and hedgerows, in accordance with the most up-to-date BS 5837, including a Tree Protection Plan (TPP) and an Arboricultural Method Statement (AMS). All construction works shall be implemented in strict accordance with the approved details.
- 18) The reserved matters shall propose no more than 50 dwellings.

*****END OF CONDITIONS*****
