Notes re Electorate Forecast Figures

1. When considering electoral arrangements, the Council must also consider any change in the number or distribution of electors which is likely to occur, as a minimum, in the following five years.
2. Electorate forecasts have been prepared using Planning Policy Team housing trajectory data on known developments and the most recent (2024) Office for National Statistics average household size in the UK of 2.35, to produce forecasts which cover the period 2025/26 to 2030/31.
